### XPress Takes Prepaid to Another Level

#### Suleiman Maáni: XPress offers the most cost effective prepaid package in Jordan

---

**Amman, Jordan – June 06, 2005:** XPress has launched its prepaid package service, offering the most innovative and cost effective package in Jordan, XPress Chief Executive Officer, Suleiman Maáni announced at a press conference on June 6<sup>th</sup>.

“The XPress prepaid package, the first to include Push-to-Talk, mobile in Jordan and the Arab region, is ideal for all users, specifically those wishing to control their budget, due to the unprecedented offer it provides,” explained Maáni. “XPress prepaid package offers Billing Per Second on both Push-to-Talk and mobile calls with these just being the fundamentals of our offering.”

Since adopting the Billing Per Second method, XPress subscribers have cited up to 50% savings on mobile telephony calls. “We fully understand the needs of the consumer and as such have included various valuable offerings in our prepaid package, including:

1. Unlimited Walkie Talkie plus mobile all in one handset
2. Billing Per Second and not by the minute.
3. Unified tariff to all networks
4. One-year validity for incoming and outgoing calls, renewable with every recharge.
5. International calls at Jordan Telecom rates and no additions
6. Local and international SMS at 3 piasters
7. XGPS (XPress Global Positioning System)
8. International Push-to-Talk

9. No activation fees

10. No monthly fees

In summary, Maáni explained that "the XPress prepaid offer provides subscribers with the ability to utilize Push-to-Talk and make mobile telephony calls all in one handset; it is a walkie talkie plus a mobile. With such an offer, we have once again reiterated our commitment towards our customers by delivering the most innovative, cost effective prepaid offer, providing the latest in technological advancement at a price tailored for everyone; from corporate clients to students at universities. As promised by XPress, we will continuously provide the Jordanian consumer with the most innovative and modern forms of telecommunications available."
